Taking Kibow Fortis® daily may help promote the growth of beneficial microbes in the gut. It does this by providing a food source for these beneficial microbes, allowing them to populate the bowel and take away space from harmful microbes. This may even help stimulate the immune system and help it to rid the body of harmful, toxin-producing microbes.

It's important to remember that a balanced diet and daily exercise will also contribute to a healthy gut microbiome and help promote immune function, keeping your body safe from disease

ing n

Wellness begins with good health, which means having a healthy gut microbiome. 80-85% of the immune system resides in the gut, so improving gut health has wide-reaching effects for your whole body.

y repopulating the gut with beneficial microbes, you can restore a healthy gut balance and improve overall wellness throughout the body.

Kibow Fortis® is an all-natural prebiotic dietary supplement designed to help you feel your best. Kibow Fortis® tablets are 100% vegan, non-GMO, gluten free, and sugar-free. All Kibow® products are made with all-natural ingredients.
